

Hawaii #1 in Nation for Long Term Care Facility Quality

Hawaii ranks higher than any other state in the quality of its nursing facilities. 38 percent of nursing facilities in Hawaii earned a five out of a possible five stars from the federal Centers for Medicare & Medicaid Services for their overall performance in health inspections, nurse staffing, and quality of medical care. This compares to a median of 21 percent for all states. Only three other states had greater than 30 percent of their facilities with five-star ratings.

U.S. News & World Report released its fifth annual [Best Nursing Homes](http://health.usnews.com/best-nursing-homes/area/hi) ratings, highlighting the top nursing homes in each state and nearly 100 major metropolitan areas. The ratings cover more than 15,000 nursing homes nationwide. “What this means for Hawaii's families is that they've got some of the nation's best options for the care of their loved ones. This validates the collaborative efforts throughout our state to share best practices.” –George W. Greene, Esq, President and CEO
